

Did you know?

In April of 2010 the International Building Code 2009 became effective in the State of New Hampshire for all new construction and remodel and renovation work.

State Law currently requires compliance with the following codes for the construction of buildings, building components or structures:

- International Building Code 2009
- NFPA 1 Uniform Fire Code 2003
- NFPA 101 Life Safety Code 2003

THE HELP YOU NEED:

Fire Safety in Bulding Design

This seminar will teach you what you need to know as a design professional in the State of New Hampshire.

The Seminar

This will be a comprehensive interactive seminar that will provide valuable information needed to apply NH State Fire Code and Building Code requirements during building design. Our focus will be on the International Building Code 2009, NFPA 1 Uniform Fire Code 2003 and NFPA 101 Life Safety Code 2003 as presently in

effect in NH. We will teach you how to identify the difference between fire-rated assemblies and fire walls, when sprinkler systems are required, and how to properly calculate building height and area requirements. We will talk about what makes wall and floor/ceiling assemblies fire-rated, requirements for secondary means of escape and differences in construction types. We will keep you involved throughout the seminar and you will come away from this seminar with a much greater understanding of the fire and building codes and the laws of New Hampshire and how they apply to you and the structures that you design. We will set aside time for questions so please feel free to bring any code questions that you may have.

shire and how they apply to you and the structures that you design. We will set

aside time for questions so please feel free to bring any code questions that you may have.

THE DETAILS

Where: The Laker Room, Church Landing, Inn at Mill Falls, Meredith, New Hampshire

Directions at: www.millfalls.com

When: Thursday April 21, 2011

Time: 8:00 a.m. to 4:00 p.m.

What's included:

- Full day Seminar
- Continental Breakfast, Lunch, Refreshment Breaks
- 6 AIA CEU's for registered architects
- Certificate of Course Completion

Cost: \$275.00 per person

Please Bring the Following Code Books

ICC International Building Code 2009

NFPA 1 Uniform Fire Code 2003

NFPA 101 Life Safety Code 2003

Our Experience:

SHAWN BERGERON:

Over 25 years experience in construction related fields
5 years teaching building code and fire code seminars
6 years as Building Inspector/Code Enforcement for Town of Conway, NH
12 years independent code consultant
